

ENGINEERING STUDIO

We build & operate B2B SaaS

Technology Right from Scratch. A senior, product-minded studio that ships production software — and runs it at scale.

Stack **Go · Temporal · React · PostgreSQL**

AI-first

Multi-tenant & **billing-aware**

Production-proven

01 • WHO WE ARE

We don't theorise about B2B SaaS — **we operate it**

Senior & product-minded

A small, senior team that thinks about the business model, not just the feature.

We run what we build

Multi-tenant, billing-aware SaaS we ship **and operate** in production — not demos.

AI woven in

LLM extraction, RAG copilots, forecasting & vision — designed in, not bolted on.

Proven products, **real traction**

IntlPull

intlpull.com

100+

organizations · startups → public sector

AI-first Translation Management System with **native MCP** — translate straight from Claude, Cursor & CI pipelines. Branching, OTA & glossary built in.

LootGO

lootgo.app

87.6K+

followers on X · 30K+ app installs

Real-world treasure-hunt rewards — daily steps become on-chain rewards. **iOS & Android**, React Native + Solana, location-based airdrops.

CodeKeep

codekeep.io

#1

Product of the Day · Product Hunt

Developer snippet manager with a **VS Code extension** & public API — save, organise and share code, used by developers worldwide.

Plus a single in-house app at **74M+ ad impressions** / **\$16.5K+** revenue (next slide) — and 8 more shipped products.

Eleven products, shipped & operated

IntIPull

AI Translation Management — **100+ orgs**

UseLoyalty

AI loyalty, rewards & retention engine

Ekada

Whitelabel commerce — stores, bookings, QR menus

ClixWall

Website monetization & ad marketplace

LootGO

Real-world treasure-hunt rewards — **87.6K+ on X**

beyondClub

No-code web3 loyalty & membership

CheckIn

Geolocation 'check-in & earn' on Farcaster

HippoDash

Analytics — your data, your insights

StoryForU

AI personalized children's stories

BeaverGrow

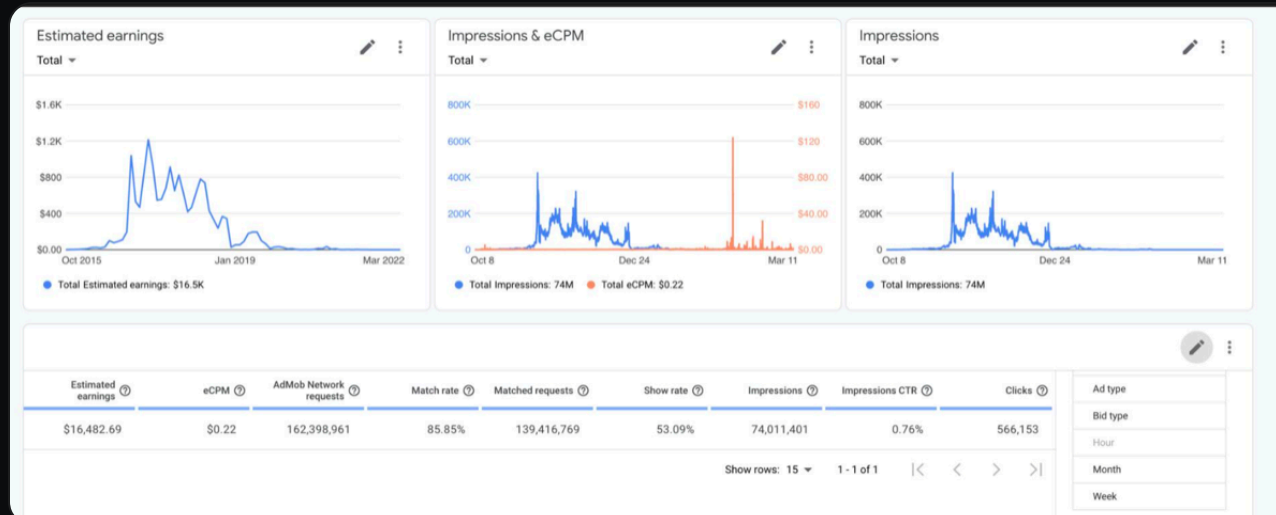

Customizable productivity platform

CodeKeep

Code snippet manager — **#1 on Product Hunt**

02 • PROOF & PARTNERS

Built to scale — trusted by the **best in tech**

**74M+**

impressions

\$16.5K+

ad revenue

#1

Product Hunt — CodeKeep

Scale shown is from a **single app** we built — AdMob lifetime:
74,011,401 impressions · \$16,482.69.

03 · WHAT WE BUILD

From idea to a product **you can sell**

B2B SaaS platforms

Multi-tenant, RBAC, audit — production-grade from day one.

AI & LLM features

Extraction, RAG copilots, forecasting, vision — with cost control.

Billing & monetization

Subscriptions, per-seat, usage metering, invoicing & dunning.

Dashboards & analytics

Reporting, exports & decision-grade insight for operators.

Mobile apps

React Native / Expo field & consumer apps.

Integrations & APIs

Webhooks, OAuth connectors, import/export & MCP.

One proven, **production stack**

Client — web dashboards, mobile-friendly views & native apps

Next.js / React

TypeScript

React Native

API & platform core — high-performance REST in **Go**, RBAC, tenancy, audit

Go (Golang)

Chi

JWT + API keys

AI services — extraction, RAG, forecasting, vision — **durable** orchestration

Temporal workflows

Vision / Document AI

LLM Gateway

Monetization & data/infra — metered billing · Postgres · object storage · observability

Stripe

Dunning

PostgreSQL

Redis

05 · PRODUCTION BUILDING BLOCKS

Battle-tested patterns — **not rebuilt each time**

- Multi-tenant orgs + RBAC · **in production**
- Auth — API keys, JWT/JWKS, SSO · **in production**
- Billing — subscriptions, invoicing, dunning · **in production**
- Usage metering & limit enforcement · **in production**
- Immutable audit / event log · **in production**
- Webhooks + automation rules engine · **in production**
- Document upload & parse pipeline · **in production**
- Temporal-orchestrated AI / LLM layer · **in production**

Reusing proven blocks → a de-risked build with predictable timelines.

Quality is the **default**

Product thinking

We design for the business model — pricing, limits & margins, not just features.

Secure by default

Input validation, parameterised queries, HttpOnly sessions, OWASP-aligned reviews.

Real AI / LLM ops

RAG, document AI & cost-controlled multi-model gateways in production.

Scale-ready

No N+1 queries, eager loading, observability & load-tested release gates.

De-risked, milestone-linked **delivery**

1 Paid Discovery

Locked architecture, data & security model, a clickable prototype and a fixed quote — credited to the build.

2 Milestone fixed-bid

Payment-linked milestones with clear deliverables — no open-ended billing.

3 Phased delivery

Each phase is a real, shippable release with its own ROI — demo, sell, iterate.

4 Managed Care

Support, maintenance & hosting as one fully-managed monthly plan.

→ LET'S BUILD

Something worth **operating**

Tell us what you're building. We'll come back with architecture, a prototype and a fixed quote — fast.
